

ASSESSMENT PROJECT 6

Project Name: Installing and Configuring Apache tomcat server on Linux

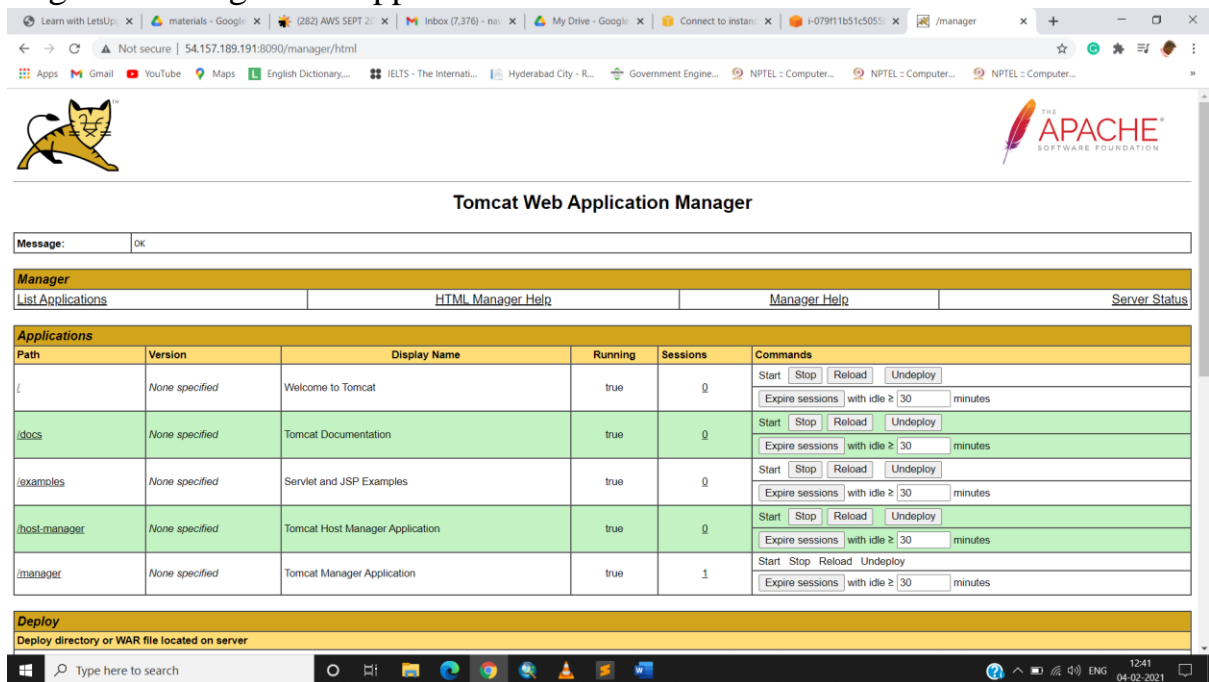

Check Tomcat-server in port 8090

Manager App

Log into Manager Webapp

The screenshot shows a web browser window displaying the Tomcat Web Application Manager. The browser's address bar shows the URL `54.157.189.191:8090/manager/html`. The page features a navigation bar with links for [List Applications](#), [HTML Manager Help](#), [Manager Help](#), and [Server Status](#). Below the navigation bar, there is a section titled "Applications" which contains a table listing the deployed applications. The table has columns for Path, Version, Display Name, Running status, Sessions, and Commands. The applications listed are: Welcome to Tomcat, Tomcat Documentation, Servlet and JSP Examples, Tomcat Host Manager Application, and Tomcat Manager Application. Each application has a set of control buttons (Start, Stop, Reload, Undeploy) and an "Expire sessions" option. Below the applications table, there is a "Deploy" section with a text input field for the "Deploy directory or WAR file located on server". The browser's taskbar at the bottom shows the Windows Start button, a search bar, and several open applications including File Explorer, Google Chrome, and Microsoft Edge. The system clock in the bottom right corner indicates the time is 12:41 on 04-02-2021.

Tomcat Web Application Manager

Message: OK

Manager
